- Flutter & Dart
- Firebase
- Node.js, Express.js
- Javascript, HTML, CSS
- RESTful APIs
- Backend Integration
- Git & Version Control
- Machine Learning
- C/C++ & Python
- DBMS, SQL, MongoDB
- Data Structure & Algorithms

Certifications

- Flutter and Dart
- Firebase with Flutter
- Python Programming & ML

Experience

VORTEXV | FLUTTER DEVELOPER INTERN

May 2025 – Present

Indore, M.P.

- Key Skills: Flutter, Dart, UI/UX, API Integration, Git, GitHub
- Built responsive mobile apps with Flutter and Dart, integrating RESTful APIs and modern UI/UX components.
- Collaborated using Git/GitHub in a version-controlled team, contributing to scalable, full-stack app development.

KATYAYANI ORGANICS | FLUTTER DEVELOPER INTERN

November 2024 - May 2025

Bhopal, M.P.

- Key Skills: Flutter, Dart, Firebase, REST APIs, Socket.io, Node.js, MongoDB, Express.js, State Management (Provider)
- Built KO-Captain (mobile) and Stockship (web) apps using Flutter, Node.js, and Firebase for logistics management.
- Handled UI, API integration, real-time CSV uploads (Socket.io), and state management; ensured stability with null-safe models and earned senior developer praise.

Projects

STUDY BUDDY (STUDY MATERIAL APP)

Tools: Flutter & Dart, Firebase

- Developed an app to provide centralized access to notes, syllabus, and previous year question papers (PYQs) for all RGPV branches and semesters.
- Integrated and organized educational resources sourced from the official RGPV website for mobile access.

LEARNING MANAGEMENT SYSTEM (LMS) Tools: Flutter & Dart, Node.js, Express, MongoDB, Provider

- Developed a full-stack Learning Management System for course creation, lecture uploads, and student enrollment, with search and filtering capabilities.
- Implemented a responsive Flutter frontend with real-time state management and a Node.js/Express backend with MongoDB for scalable data storage.

TELEMEDICINE APP

Tools: Flutter & Dart, Deep Learning, Firebase

- Video conferencing app for doctor and patient with appointment booking, chatting, video calling and voice calling feature.
- App has four ML models like Chatbot, Disease detection from symptoms, Medicine Recommendation and patient review to rating conversion.

Achievements

- Won Summer of Code Competition in College
- Won Branch Master Competition in College
